## A Leading Global Manufacturer, Supports Enhanced Security and M&A Growth with Logically

### About Abracon

Abracon, LLC is a leading global manufacturer of passive and electromechanical timing, synchronization, power, connectivity and RF solutions. The Abracon, LLC family of brands includes Abracon, ILSI, Ecliptek, MMD and Oscilent. Focused on quality and innovation, Abracon helps engineers transform their ideas into products that meet the opportunities of tomorrow.

The company is ISO9001-2015 certified with design and application engineering resources in Texas and sales offices in the U.S, China, Taiwan, Singapore, Scotland, Israel, Hungary, UK, and Germany. Abracon's products are offered through its global distribution network.

Ada Stepan is the Vice President of Global Operations at Abracon and has been working closely with Logically for the past two and a half years. As Abracon's VP of Operations, Stepan is focused on enhancing quality within the supply chain and providing integration enhancements. Her primary areas include Information Technologies automation and logistic operations, such as warehousing, transportation and programming.

### IT Challenge

In February 2019, prior to transitioning their environment to Logically, Abracon suffered a cyber-attack that compromised the company's email and back-up servers. Logically sprang into action and provided a complete infrastructure to support the ERP and the company's transition to Microsoft's cloud-based applications. ***"Logically provided the support we needed when our company was in crisis mode. None of Abracon's sensitive employee or financial data was breached. A full forensics investigation was completed and Logically had the company up and running in a short time,"*** said Stepan.

***“We were ready for an IT partner to manage our IT services globally. Since IT is not our core competency, we structured an RFQ to find the best partner to support our transition from an on-premise server environment to a cloud-based solution. Our decision to partner with Logically gave us a phenomenal team to work with.”***

ADA STEPAN | VP of Global Operations at Abracon

***“Working with Logically gives me the time to focus on our core competencies and knowing Abracon is in a secure environment means I don’t need to add staff and head count to have a powerful IT team.”***

ADA STEPAN | VP of Global Operations at Abracon

***“When someone gets into the trenches and supports you like Logically did, it gave me complete confidence in their capabilities to handle anything,”*** added Stepan.

In addition to assisting Abracon with this crisis, Logically has been instrumental in maintaining the company’s 20-server environment, the ERP system and continued migration to a cloud environment. Also, Logically recently supported Abracon’s first acquisition, a company complementing Abracon’s existing product offerings, and made the transition seamless from an IT perspective.

## Moving Ahead

Abracon is on an exciting growth trajectory with another acquisition planned for this fall. Stepan is looking forward to a continued partnership with Logically to ensure the acquisition is handled smoothly from an IT perspective. As staff members continue to work remotely during the pandemic, Logically’s Managed Services, a team of experienced engineers and excellent professional services, will continue to provide the value and ROI that Abracon requires to continue to grow, even during difficult times.
